

Kwik-Chuck

Nameplate / Part Vacuum Holding Table

The Kwik-Chuck KC-64 system is designed to streamline your nameplate and tag marking operation using self-generating vacuum to hold down & flatten products during the marking operation. The system is self-contained and requires no external vacuum systems or pumps! Just plug it into the side of the Kwikmark machine and go.

Features

- Modular design / internal logic
- Fits onto optional T-Slot table and plugs into side of the machine
- Automatically turns on at cycle start
- Shuts off after part is marked
- Adds positive air "puff" to release part
- Heavy duty precision base plate
- Integrated vacuum system with a 6" x 4" effective vacuum area
- Field removable filter system
