

Maxi-Vise

Engineered Tag and Part Vise

The Maxi-Vise is designed to streamline your nameplate and part marking operation using a precision vise that supports and gently clamps and holds down your product during the marking operation. 12.0" x 7.5" part capacity. Modular design.

Features

- Large ground steel surface provides the ideal foundation for clamping and supporting name tags
- Mounts directly to the Kwikmark optional T-Slot Base
- Easy twist knob provides sufficient clamping force
- Great for quick changing between parts of varying sizes
- Quick release lever saves time for coarse adjustment
- Ideal for holding awkward small machined parts
- Low profile jaws with angular surface to force work piece "down"
- Features precision ground tool steel construction
