The Kwikmark dot peen marker is ideal for identifying firearms and their associated components. It features a true file based control system requiring no PC for operation. Date coding and multiple level serializing are built in to the system. No PC is required for operation. System features network connectivity and bar code scanner input (to minimize error).

Production data (for each part) is time & date stamped with its recorded unique serial number. This history file may be uploaded for documentation and reporting requirements. In addition the software automatically "builds" a document that may be directly e-mailed to the ATF bureau.

All systems are designed & manufactured in our clean, state of the art facility on modern CNC equipment to the industry's most stringent quality control. Over 25,000 sq ft is dedicated to research / development & high tech assembly. The SYSTEMS feature time proven designs with pre-engineered stations requiring minimal "custom" tooling for rapid deployment.
